

John Roshan, MD, DM[Card], CCDS, CEPS is a Professor in the Cardiology Department at Christian Medical College Vellore.

He did his undergraduate and postgraduate training at the same institution during which he was the recipient of several awards that included the AV Gandhi prize for excellence in Cardiology. He had his initial cardiac electrophysiology training under Dr. Tom Peter Professor Emeritus University of

California, Los Angeles. He thereafter did his adult electrophysiology fellowship at the Toronto General Hospital, Canada followed by a pediatric electrophysiology fellowship at the Hospital for Sick Children Toronto Canada. He was a pioneer in introducing Transesophageal EP studies in neonates in India. He has had a stellar academic career and has to his credit several scientific publications.

His special interests include VT ablation and he has to his credit performed the same in a patient with severe ventricular dysfunction with ECMO back up, the first of its kind in Asia. His other area of interest has been in percutaneous lead extraction and he is among the first to use the Tightrail device for ICD lead extraction in India. He has a great passion for teaching and has conducted several ECG and EP workshops in and around Vellore. His other interests include hiking in National Parks, doing long road trips, and watching wildlife in their natural setting.
