

Department of Pulmonary Medicine

The diagnosis and management of sleep apnoea and Sarcoidosis often involve close coordination between the EP division and Pulmonary medicine towards optimizing patient care and management. Dr. Ashwin Oliver helps with assessing the patients for sleep apnea and triaging them for the sleep study and therapy beyond. Dr. Barney Isaac and Dr. D.J. Christopher are part of the multidisciplinary team that meets periodically to decide on the management of patients being evaluated for Cardiac Sarcoidosis.
