

Department of Cardiology

The Department of Cardiology in CMC comprises 3 Units that together handle a large volume of patients with Cardiac illnesses. They run a busy outpatient of over 300 patients every day. The department has among its team; members with niche areas of expertise like peripheral angioplasty, EVAR [EndoVascular Aortic Repair], TAVI [Trans Catheter Aortic Valve Replacement], Congenital cardiac disease interventions and coronary interventions like Rotablation. The team is also proficient in using the FFR [Fractional Flow Reserve], IVUS [Intravascular Ultrasound], and IFR [Instant Flow Reserve]. The team also comprises experts in heart failure management with a fully functional cardiac rehabilitation center.
